Bacteriol. 177:5379-5380(1995).
-: FUNCTION: Uptake of arabinose across the boundary membrane with the concomicant export of a proton (symport system).
-: SUBCELLULAR LOCATION: Integral membrane protein. Inner membrane.
-: SIMILARITY: Belongs to the sugar transporter family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           PROSITE; PS50850; MFS; 1.

The araE low affinity L-arabinose transport promoter. Cloning, sequence, transcription start site and DNA binding sites of regulatory proteins.,
J. Mol. Biol. 171:369-381(1983).
-!- FUNCTION: Uptake of arabinose across the boundary membrane with the concomicant export of a proton (symptort system).
-!- SUBCELULAR LOCATION: Integral membrane protein. Inner membrane.
-!- SIMILARITY: Belongs to the sugar transporter family.
                                    sugar transport proteins are homologous.";

-- FUNCTION: Active uptake of hexoses.
-- SUBCELLUAR LOCATION: Integral membrane protein.
-- SUBILARITY: Belongs to the sugar transporter family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           2 (POTENTIAL).

MO1f K., Tanner W., Sauer N.;

"The Chlorella H+/haxose cotransporter gene.";

Curr. Genet. 19:215-219(1991).

-!- FUNCTION: Active uptake of hexoses.

-!- SUBCELLULAR LOCATION: Integral membrane protein.

-!- INDUCTION: By glucose.

-!- SIMILARITY: Belongs to the sugar transporter family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          οĘ

Synechocystis sp. strain PCC6803. I. Sequence features in the 1 Mb
region from map positions 64% to 92% of the genome.";
DNA Res. 2:153-166(1995).
--- SUBCELLULAR LOCATION: Integral membrane protein.
--- SIMILARITY: Belongs to the sugar transporter family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              "Sequence conservation among the glucose transporter from the cyanobacterium Synechocystis sp. PCC 6803 and mammalian glucose
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Synechocystis sp.
